Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 April 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

The request for continued examination under 37 CFR 1.114 filed on April 7 and based on parent Application No. 09/506,246 is acceptable.

The claims 10, 19, 25, 31, 39 are rejected under 35 U.S.C. § 112, first paragraph, because the specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention, because the specification does not provide evidence that the claimed biological materials are (1) known and readily available to the public; (2) reproducible from the written description.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Response to Amendment

The following is responsive to Applicant's amendment received April 7, 2003. No claims are cancelled. No new claims are added. Claims 1-40 are currently pending.

Applicant's arguments traversing the previous claims rejection under 35 USC 112, paragraph 1, set forth in the office action mailed April 24, 2001 have been considered but, respectfully, are not found to be persuasive.

Said rejection is maintained essentially for the reasons given previously in the office action mailed April 24, 2001 with the following additional comment:

Art Unit: 1614

It is essentially Applicant's position that claims 10, 19, 25, 31 and 39, as amended, are enabled because based on the specification, specifically page 16, lines 5-10, one of ordinary skill in the art can make a monoclonal antibody directed against HIF and determine whether the antibody has a binding affinity of 3×10^{-7} for HIF using routine skills. Thus a deposit of monoclonal antibody 26-10 is not necessary to satisfy the requirements of 35 USC 112, paragraph 1.

Said arguments have been considered but are not found to be persuasive.

The Examiner respectfully maintains that a deposit is necessary to satisfy the requirements of 35 USC 112, paragraph 1. Antibodies to HIF will be produced when injected into an animal but the resulting antibodies may differ in properties. It appears from Applicant's claims, even as amended, that monoclonal antibody 26-10 is required to perform the claimed methods. Therefore a deposit remains necessary because it would make the claimed antibody available to the public and would allow one of ordinary skill in the art to practice the claimed invention. Perhaps Applicant may consider amending the claims by cancelling "monoclonal antibody 26-10" and adding a limitation which recites the use of an antibody which has a range of binding affinities. For example, Applicant may consider adding into the claims, the language at page 11 of the specification, lines 9-11.

Conclusion

Claims 10, 19, 25, 31, 39 are rejected.
